

CSR Projects / activities for FY 2025-26

Name of Project	Item from the list of activities in Schedule VII	Projects Description
Skill Development Program	Promoting education, including special education and employment enhancing vocation skills especially among children, women, elderly and the differently abled and livelihood enhancement projects	Upskilling of Youth with Disabilities towards Employment in AADI's Urban Community Based Rehabilitation (UCBR) Program. The program offers education and life skill Development of children with disabilities.
Skill Development Program	Promoting education, including special education and employment enhancing vocation skills especially among children, women, elderly and the differently abled and livelihood enhancement projects	Structured skill training programs to young adults with Autism The program offers structured skill training programs tailored to the demands of the job market for young adults with Autism. Training areas are chosen based on each individual's functional abilities and personal interests. The training areas simulate real work environments to ensure that the training is practical, meaningful, and prepares them effectively for mainstream employment.
Skill Development Program	Promoting education, including special education and employment enhancing vocation skills especially among children, women, elderly and the differently abled and livelihood enhancement projects	Vocational skilling (skill development program) for youth with disabilities The program targets young individuals with disabilities, offering comprehensive skill development, sustainable employment support, and industry-relevant training, empowering them for a successful future. The program combines physical training centers and online platforms for a flexible, accessible, and holistic learning experience.

Skill Development Program	Promoting education, including special education and employment enhancing vocation skills especially among children, women, elderly and the differently abled and livelihood enhancement projects	Development of an Inclusive Learning Management System (LMS) for Neurodiverse Individuals The Program deliver life-skills and employability programs through physical and hybrid formats, for training and placement of neurodiverse learners. While these programs have demonstrated strong and sustainable outcomes, their reach is restricted by financial constraints, geography, trainer availability, and the absence of a centralized digital system that ensures continuity, consistency, and scalability of learning.
Rural Development Project	Rural development projects	Focussed Rural Development through Waste to Resource Transformation. The program initiative that turns urban surplus into a powerful tool for rural development. Instead of charity, it engages communities to identify and solve their own local issues - like water security, community hygiene, sanitation, access, local infrastructure, etc. through collective effort. As a dignified reward for their work, families receive carefully curated Family Kits of day-to-day essentials, helping meet their needs while fuelling large-scale development rooted in dignity, self-reliance, and community ownership.
Mid Day Meal Program	Eradicating hunger, poverty and malnutrition, "promoting health care including preventive health care" and sanitation including contribution to the Swachh Bharat Kosh set-up by the Central Government for the promotion of sanitation and making available safe drinking water.	Mid Day Meal Program The program is to promote access to education and to alleviate malnutrition in India through the Mid-Day Meal Programme.
