Lemon Tree Premier

Bobby Mukherji and Associates (BM&A) together designed the Lemon Tree Premier hotel in the emerging business district of Gurugram. The hotel is popularly conceived as one of the best with a unique character, from the lobby and restaurants to the bar, complete with vintage-style art and clubby leather sofas, making it the perfect place for businessmen and professionals to unwind.

Bobby Mukherji, founder and principal architect at BM&A, said, "When we got the opportunity to work with the Lemon Tree Premier property, we were looking at merging style with simplicity. 'Nostalgic and modern', is a phrase that pretty well sums up what the New York hotel scene is all about at the moment. This hotel was conceptualised to recreate just that. We designed the property on the principles of universal design, allowing people of varying abilities to access all areas with ease and offering specially designed rooms and multiple suites for differently-abled guests. BM&A is known to get into the character of the edifice it designs, which reflects in the end product."
